Uttara University

PROJECTS

Universalyst Frontend Developer
Social Platform for Artists

- Designed and developed a responsive frontend using Next.js and Tailwind CSS, including homepage, artist profiles, galleries, and a dashboard for managing artwork and sales.
- Took initiative in API integration, resolving structural inconsistencies and collaborating closely with the backend team to ensure smooth data flow and functionality.
- Implemented features like real-time updates using WebSockets (Pusher) and dynamic data fetching with SWR, enhancing platform responsiveness and user engagement.
- Successfully delivered the project under tight deadlines, demonstrating strong problem-solving, cross-functional teamwork, and resilience under pressure.

Notionhive Frontend Developer
In-house website

- Developed the official Notionhive website using Next.js and React, focusing on performance, responsiveness, and SEO optimization.
- Integrated a headless CMS to enable dynamic content management and streamlined client updates.
- Handled complete frontend architecture and API integration, ensuring smooth data flow and a seamless user experience.
- Collaborated with cross-functional teams to deliver a scalable, brand-aligned website under tight deadlines.

LANGUAGES

- Bengalii (Native)
- English (Fluent)
